found a small "bug"

when clicking on today but you are in another month or year the calendar won't change to today's month and year:

changed Calendar::LeftDown(Point p, dword keyfile)

```
[...]
```

```
if(aspopup) {
```

```
[...]
```

```
} else {
```

```
    [...]
```

```
    RefreshDay(prevday);
```

```
    if(istoday)
```

```
        SetDate(dt); //this line was changed
```

```
    else if()
```

```
        [...]
```

```
}
```
