Subject: Re: Statusbar disappears
Posted by zaurus on Tue, 14 Nov 2006 05:55:35 GMT

Hi!

Attached is a test case. If I enable the 'Zoomable()' I can see the statusbar. It seems to have something to do with the Icon. If there is no Icon then I can see the statusbar even with no 'Zoomable()', but the application extents itself over the taskbar at the bottom, which is not the case when Icon is used.

Maybe some small hidden bug somewhere.

I use Upp610dev2 on Win2K with mingw compiler.
