Subject: Drag & Drop Example?

Hi all!

I'm new in Ultimate++ - but I'm learning new things every day.

Currently I would need drag & drop support to move objects on screen. As I read, this is not implemented yet. But there must be a solution, because the layout editor does support drag & drop and the resize marks. Maybe someone can point me to a part of code, where I can find this part.

Thanks and regards,

WebChaot
