zsolt wrote on Mon, 20 November 2006 06:03I'm using something like these two functions to open and close sqlite database file:

Interesting, why two functions and Single?

In my apps, I open DB in GUI_APP_MAIN and let destructor to close it.

```
GUI_APP_MAIN {  
    Sqlite3Session s;  
    if(!s.Open(...)) ...  
    SQL = s;  
  
    ..run the app...  
}
```
