Subject: Assamblies and nests

i would like the possibility to enable/disable assamblies and use assambly names in nests.

so i can switch between two ultimate sources:

assamblies:
* uppsrc_stable
* uppsrc_dev

and nests in MyApp would look like this:
~/upp/MyApp;uppsrc_stable;uppsrc_dev

and now i can enable either uppsrc_stable or uppsrc_dev

another way would be to add a dropdownlist to the nestdir, so i have only assambly uppsrc and change the dir of the assambly with the dropdown (eg history of 4)
but assamblies in nests would still be neede.

or is ther something similar already?

Bas
