
Subject: scrollbar missing for LineEdit [FIXED]

When the text of the linedit is modified programatically, the scrollbar is not displayed even if the text is longer than the horizontal size. In this example, try to enter a long text in the upper LineEdit. The lower linedit should get a scrollbar the same time as the upper one, as their contents are kept the same.

```
#include <CtrlLib/CtrlLib.h>
class Test : public TopWindow
{
public:
    LineEdit a, b;
    Splitter s;
    void aChanged() { b <<= ~a; }
    Test()
    {
        a <<= THISBACK(aChanged);
        Add(s.Vert(a, b).SizePos());
        Zoomable().Sizeable();
    }
    typedef Test CLASSNAME;
};
```

```
GUI_APP_MAIN
{
    Test().Run();
}
```
