Hello,

I'm working with the gridctrl and I'm very satisfied.

Now I met the following problem. In a column I've added a ButtonOption that shows 2 images depending by its two possible states.

Unfortunately the gridctrl doesn't show the image but just the value (1 or 0) of the state. The image is shown only during the editing of a row (by pressing ENTER or double click).

Is there a possibility to show the image associate to the buttonoption for all the cell of the column? With the arrayctrl this is possible.

Luigi
