Should better be

```
int xdpi = 96*1024;
```

I suppose.

Guido

Why?

My dpi setting is 75, so this would not work.

Your first solution seems to be right.

Matthias

Only used as default, in case Gtk doesn't return a dpi value (although I doubt that can happen).
96dpi is the GTK default anyway, according to the docs, and Mirek used it as default too.
