```
G_obj *b = GTK().gtk_widget_render_icon(widget, detail, state, NULL);
GDK().gdk_draw_pixbuf(gw, NULL, b, 0, 0, 0, 0, -1, -1, shadow, 0, 0);
GOBJ().g_object_unref(b);
```

Looking into the API docs, it should be:
```
GdkPixbuf *b = GTK().gtk_widget_render_icon(widget, detail, state, NULL);
GDK().gdk_draw_pixbuf(gw, NULL, b, 0, 0, 0, 0, -1, -1, shadow, 0, 0);
GOBJ().g_object_unref(b);
```

and widget has to be != NULL, but I think this is the case. Otherwise one should call gdk_drawable_set_colormap() on b again.
