Bug?: Maybe this is another one. Using that application, when the prompt is focussed on the screen, it's not getting the focus, which is weird because i'm used to pressing 'Esc' to remove pesty buggers like that... It's both good and bad. Good because you can't actually click on it. Bad because it's "not default windows behaviour" if you get what I mean.

Ufff... 3 hours to fix that
