In Draw/Draw.h there are some case sensitive issues for Linux compiles.

```
#define DLIMODULE  GTK
#define DLIHEADER  <draw/gtk.dli>
#include <Core/dli_header.h>
```

```
#define DLIMODULE  GDK
#define DLIHEADER  <draw/gdk.dli>
#include <Core/dli_header.h>
```

```
#define DLIMODULE  GOBJ
#define DLIHEADER  <draw/gobj.dli>
#include <Core/dli_header.h>
```

should be

```
#define DLIMODULE  GTK
#define DLIHEADER  <Draw/gtk.dli>
#include <Core/dli_header.h>
```

```
#define DLIMODULE  GDK
#define DLIHEADER  <Draw/gdk.dli>
#include <Core/dli_header.h>
```

```
#define DLIMODULE  GOBJ
#define DLIHEADER  <Draw/gobj.dli>
#include <Core/dli_header.h>
```
