forlano wrote on Tue, 05 December 2006 20:45Hello,

I move the cursor of the arrayctrl by using the up and down arrow keys. I would like to intercept this action. None of the existing When* works. Perhaps I missed something or I need to override WhenBar?

Luigi

What about

...

```
void OnCursor()  
{  
    PromptOK("Cursor moved!");  
}
```

...

```
ArrayCtrl my_array_ctrl;
```

...

```
my_array_ctrl.WhenCursor = THISBACK(OnCursor);
```

...

?

Werner
