Then, it is remarkly close to working. The icons still have some glitches, but in general it looks good. I don't know what to do about flagPPC, so it gets added in CppBuilder::IncludesDefinesTargetTime at the moment.

Some notes, it causes a Bus Error when you exit, but seems stable to use. Occasionally spits out "Heap leaks detected!" so there might be some cleanup required in the memory code. Would you like me to try to use malloc again?
