hojtsy wrote on Wed, 25 January 2006 10:40There seems to be no logical place for the discussion about the demos and references included in u++ installation. Maybe you can create a new subgroup for them inside "Code snippets..."

I've expanded the description of the first forum in "Code snippets".
I think, it's logical to have have demos, references and users apps in progress in one place at least until we have hundreds of topics...

Is it ok this way?
