Trying to compile the "Hello World" example package and:

plugin\z: 15 file(s) built in (0:02.50), 167 msecs / file, duration = 2598 msecs
----- HelloWorld (GUI MAIN GCC32 DEBUG SHARED DEBUG_FULL BLITZ LINUX) (9 / 9)
hello.cpp
HelloWorld: 1 file(s) built in (0:02.02), 2020 msecs / file, duration = 2026 msecs
