Subject: Don't autosave
Posted by hojtsy on Thu, 26 Jan 2006 09:36:29 GMT

I would like request the feature that source code files are not auto-saved when the tab is closed or switched. In case of closing tabs or TheIde, a save confirmation popup should come up. The current auto-saving behaviour is different from practically all text editors and development environments, and thus unexpected and unintuitive. If the current behaviour is required by somebody there could be an checkbox for it in the options.
