Well, there seems to be problem with this date emulation - no expressions are supported, only Date columns selected.

My suggestion was to encode dates as some very high doubles.

E.g.

```
Date d;  
//...  
double x = (d - Date(1, 1, 1)) * 1.0e300;
```

Loosing a double range between 1.0e300 - 1.0e307 does not seem a big problem to me.  
Moreover, at least some expressions work as expected.

Mirek
