Well, there seems to be problem with this date emulation - no expressions are supported, only Date columns selected.

My suggestion was to encode dates as some very high doubles.

E.g.

Date d; //... double x = (d - Date(1, 1, 1)) \* 1.0e300;

Loosing a double range between 1.0e300 - 1.0e307 does not seem a big problem to me. Moreover, at least some expressions work as expected.
