unodgs wrote on Sat, 16 December 2006 00:32The result of sorting is correct...  
There are 2 solutions:  
1. I could implement this...  
2. Insert 'z#' value to these cells and make your own GridDisplay class in which you ignore displaying the content of cell (instead passing v to the parent display pass ")

Thanks,  
I'll try to implement the second option.  
Luigi
