Subject: Critical feature - namespace

Well, I have came to conclusion that we should finally add namespaces.

I have to apologize it took so long - in fact, there was a very little need to do so so far. But I am afraid longer it takes, more people will be angry on us...

So please comment the plan:

- namespace will be "Upp" (alternatives: "upp", "UPP", "ultimatepp", "Ulitmatepp").

- there will be NONAMESPACE config flag, but default will be "use namespace"

- I will do it today

Mirek
