zsolt wrote on Tue, 19 December 2006 09:56It uses XP theme if you add a .manifest file to your project.

And additionally, you have to add a .rc file with content, something like:

```
1 24 "MyProject.manifest"
```

```
5555 ICON "MyProject.ico"
```

The MyProject.manifest is something like this:

```
<assembly
```

```
  xmlns="urn:schemas-microsoft-com:asm.v1"
```

How user friendly

I guess I will rather change the look of dialog to be more platform -like in the next iteration.
