As requested, attached file.

I guess I could also mention two other things, they don't really affect the usage of U++, but sometimes perfection is desirable.

When a Window is minimized (or possibly removed) Console gets:

```
X Error: BadMatch (invalid parameter attributes), request: X_SetInputFocus, resource id: 6295038
= 600DFE
```

but it is just noisy, no noticable impact.

And when you exit the Ide:

Program received signal EXC_BAD_ACCESS, Could not access memory.

Reason: KERN_PROTECTION_FAILURE at address: 0x000004d0

0x00f20468 in XQueryExtension ()

#16 0x00003a44 in cxa_atexit_wrapper ()

#17 0x9001455c in __cxa_finalize ()

#18 0x90014444 in exit ()

#19 0x00002c58 in _start ()

#20 0x00002958 in start ()

But all files are saved correctly, so again, no impact, just not "clean". I used File/Exit there, but same happens when you push Close X-icon.
