bmphdr:

In Core/util.h there should be

```
inline word  SwapEndian(word v)  { EndianSwap(v); return v; }
inline int16 SwapEndian(int16 v)  { EndianSwap(v); return v; }
inline dword SwapEndian(dword v)  { EndianSwap(v); return v; }
inline int   SwapEndian(int v)    { EndianSwap(v); return v; }
inline long  SwapEndian(long v)   { EndianSwap(v); return v; }
inline int64 SwapEndian(int64 v)  { EndianSwap(v); return v; }
inline uint64 SwapEndian(uint64 v){ EndianSwap(v); return v; }
```

I am really not sure what can be wrong here....

(Color.h altered).
