I don't know whether UPP team will consider dynamic linking in the future release.

Well, I think that support is already there, in TheIDE. But thanks for finding all related troubles of current release, we had it on ToDo list.

Anyway, as for broader support, I have even wider ideas:

 http://www.ultimatepp.org/forum/index.php?t=msg&th=1774& amp;start=0&

(which involves dynamic linking as well).
