Subject: Creating Layouts Posted by AngelPortal on Tue, 26 Dec 2006 14:59:08 GMT View Forum Message <> Reply to Message

I can create my own layout, I mean insert a new one in the project. I did this by creating with NotePad the following file LAYOUT(cxpLayout, 464, 320) END_LAYOUT

But I can use it in my project. Is there a automatic way to do so.
