luzr wrote on Thu, 04 January 2007 13:01P.S.: U++ runs very well on Cygwin Win32 X11 server connected to Linux machine.

At the palace where I work we use X-Win32. May be I'm wrong, but I think that all commercial companies use commercial X-Servers. And nobody wants to change an X-Server for UPP's sake.

I'm sorry, I just wanted to point out the problem. It might be important.
