thanks for testing

i tried the same and included a docfile with a screenshot

the strange thing is that i fill in aaa/bbb as package name and the files are created in 2 new directories

D:\ultimateapps\aaa\bbb   and
D:\ultimateapps\aaa\bbb\aaa

in aaa\bbb are created the bbb.h bbb.cpp bbb.upp main.upp
in aaa\bbb\aaa bbb.lay and bbb.upp

I cannot see what i can do differently
