guido wrote on Tue, 09 January 2007 16:11 Chameleon refactoring seems to have broken X11 theming.

I get black on black menus (highlighted items show ok).

The Linux package is up, so I wonder if others had more luck.

I had to compile upp myself, as the package again is Ubuntu only.

Guido

Well, I tried to read the color of menu from gnome. It is likely theme related - what theme do you use?

Mirek
