The attached code changes the Icon Designer "Magnify" button into a pair of "Zoom In" and "Zoom Out" buttons. I find this much easier to use. Possibly you could combine this into the main release if you think it is appropriate. The attached code is based on the 612-3 release.

Thanks, I was considering this too. Patch applied, welcome to the contributors list

Looks you are learning pretty quickly, despite the lack of docs:)

Mirek
