All right, I finally figured out how to compile it. I was obviously missing the path to the mentioned file, so I edited the 3rd line of the Makefile, which originally read:

```
CINC = -I$(UPPDIR1)
```

so that it said:

```
CINC = -I$(UPPDIR1) -I/usr/include/freetype2/
```

That was enough to make it work.

BTW, I was compiling the 605 version.
