Ops....

OTHER means first index of font that is not "standard"

Each font has an integer index ("face"). If you want to add specific font, you have to add its index.

You can enumerate fonts (getting index-name pairs), you can also find index for given face name.

See

[http://www.ultimatepp.org/src\\$Draw\\$Font\\$en-us.html](http://www.ultimatepp.org/src$Draw$Font$en-us.html)
