Ops, found a bug causing CJK character widths to misbehave:

Draw.h, 227:

```
struct CharMetrics {
 int  width;
 int  lspc;
 int  rspc;

 bool operator==(const CharMetrics& b) const
     { return width == b.width && lspc == b.lspc && rspc == b.rspc; }
};
```

In GetPage, I have used 'page' instead of 140, that is better too.

Please test!

Which leaves us still with two problems: PDF and IME....

Moving this thread to "development area" now...
