Errrrmm. Sorry but this problem was not solved. I am now getting this somewhat shorter log file. I don't want this log to be created by the release-mode application.

HttpClient::Execute

socket host = something:80

host = something, port = 80

request: GET /something.xml HTTP/1.1

URL: http://something/something.xml

Host: something

Connection: close

Accept: \*/\*

Agent: Ultimate++ HTTP client

//HttpClient::Execute

TIMING Socket::Data::Read: 0.0 us - 0.0 us ( 0.0 us / 14 ), min: 0.0 us, max: 0.0 us, nesting: 1 - 14

TIMING Socket::Data::PeekRead: 395.0 ms - 79.0 ms (395.0 ms / 5 ), min: 0.0 us, max: 342.0 ms, nesting: 4 - 14

TIMING Socket::Data::Write: 2.0 ms - 399.9 us ( 2.0 ms / 5 ), min: 0.0 us, max: 1.0 ms, nesting: 1 - 5

TIMING Socket::Data::PeekWrite: 32.0 ms - 4.0 ms ( 32.0 ms / 8 ), min: 0.0 us, max: 30.0 ms, nesting: 2 - 10
