I might as well add the exact linker error:

```
guido@Sid:~/upp_2007.1beta2_i386/data/bin$ ldd theide
./theide: /lib/tls/libc.so.6: version `GLIBC_2.4' not found (required by ./theide)
```

Guido

have build a new one - should work on debian testing and following

could you please check it:
<http://www.fallingdutch.de/media/theide>

thank you,
Bas
