So why didn't you add it to the menu

Guido

OK, it is there now

However, "menu/toolbar in a row" option grew toolbar a bit too wide (with two more icons), so I have decided to not present Edit icons (undo/redo/copy/paste/cut) in toolbar when option is active. In fact, on my notebook with 1024 wide screen it was already too wide anyway, so that is one more problem solved. (I think most people do not use toolbar buttons for copy/cut/paste anyway).
