\_Seven\_ wrote on Wed, 31 January 2007 13:54Hi. I'm using Ubuntu 6.10 and i installed the last version of Upp. I tried to use the file .deb but an error occurred during the installation.

Which error appeared? it might be helpfull to know the error.

\_Seven\_ wrote on Wed, 31 January 2007 13:54Then i tried to install Upp from the sources and everything ran well but when i start Upp appear the version that i had previously. I installed the last version of Upp without uninstalling the previous one that i had on pc.

What i do now?

What did you do to install the files from souces?

did you do the following?

\$ make

\$ sudo make install

\_Seven\_ wrote on Wed, 31 January 2007 13:54Sorry about the noob question and my poor english

Feel free to ask such "noob questions"! Everyone started with little knowledge

Bas
