Seven wrote on Wed, 31 January 2007 13:54Hi. I'm using Ubuntu 6.10 and i installed the last version of Upp. I tried to use the file .deb but an error occurred during the installation.

Which error appeared? it might be helpfull to know the error.

Seven wrote on Wed, 31 January 2007 13:54Then i tried to install Upp from the sources and everything ran well but when i start Upp appear the version that i had previously. I installed the last version of Upp without uninstalling the previous one that i had on pc.

What i do now?

What did you do to install the files from souces?

did you do the following?

\$ make

\$ sudo make install

Seven wrote on Wed, 31 January 2007 13:54Sorry about the noob question and my poor english

Feel free to ask such "noob questions"! Everyone started with little knowledge
