The behavior of SaveAs dialog was improved but a strange situation may appear yet (tested in AdressBook). If a directory was selected and then I type the filename to save, button OK label remains "Open" (although it's action is SAVE).

```
if(mode != SAVEAS || list.HasFocus() && list.IsCursor() && list[list.GetCursor()].isdir)
```

improves the situation but not eliminates it (if nothing is typing on file box it appears again).

Andrei
