Subject: Re: Crash when using Microsoft's Virtual Desktop Manager Posted by mirek on Fri, 09 Feb 2007 22:21:55 GMT View Forum Message <> Reply to Message

deltastorm wrote on Fri, 09 February 2007 13:38Has this bug ever been tracked down? I am having the same problem with 2007.1 beta 3 on WinXP. If I am running theide, switch to another virtual desktop, then switch back, theide will eat up all my CPU cycles and be unable to redraw itself. The only way to close the program is through Task Manager.

WinXP SP2 nVidia 6150LE

No, not yet. Any information is highly welcome.

Mirek
