---

I installed TheIDE on one more computer and I got this error :

Quote:

d:\devel\_upp\uppsrc\richtext\txtop.cpp(52) : fatal error C1001: INTERNAL COMPILER ERROR  
(compiler file 'f:\vs70builds\3077\vc\Compiler\Utc\src\P2\main.c', line 148)

Please choose the Technical Support command on the Visual C++

Help menu, or open the Technical Support help file for more information

I googled and (I think) installed VC++ SP6.

But I didn't set up Environment variables for VC++ as Ultimate++ mentioned somewhere.

I'm still getting this error if Default BLITZ is checked or RichText.

What is the reason?
