Thanks for all the hard work!

I just downloaded it and am working on the ebuild. It dies compiling uppsrc/ide/Install.cpp with the follwing error:

uppsrc/ide/Install.cpp: In function 'bool Install()':
uppsrc/ide/Install.cpp:319: error: 'class Upp::Progress' has no member named 'Ad'
uppsrc/ide/Install.cpp:320: error: expected `;' before 'if'

I tried to simply add a ';' but then it complained that Ad was not a member of 'class Upp::Progress'
