Hello,

several versions ago with the following Display:

```
class ColoredCell : public Display
{
public:
  static bool isBlack(String s);
  void PaintBackground(Draw& w, const Rect& r, const Value& q,
             Color ink, Color paper, dword style) const;

};

bool ColoredCell::isBlack(String s)
{
  if(s[1] == 'B') return true;
  return false;
}

void ColoredCell::PaintBackground(Draw& w, const Rect& r, const Value& q,
                   Color ink, Color paper, dword style) const
{
   if( isBlack(AsString(q)) ) paper = Color(255, 150, 150);
 Display::PaintBackground(w, r, q, ink, paper, style);
}
```

I was able to set pink the background of a cell. Only I saw that the color is not uniform. It does not appear under all the content of cell:

It seems a problem of transparency.
Am I wrong?

Luigi
