Well, I think we should use 1 - add method to Display.

Note however that it will likely paint just single-color background (I think it should be given single Rect that has to be painted as margin - means 2 calls of this method to paint 2 margins in ArrayCtrl column).

Maybe it should be used by standard Display::Paint (and maybe others) to erase background too...

Leaves last and most difficult task... find a name for the method

Mirek
