luzr wrote on Fri, 03 February 2006 07:38To "minimize to tray", my guess is that simple minimize+close would work quite well.I think I will rather hide it with WndShow(false). I would like to keep the internal state of the window unchanged when "minimized" to the tray.

Other question: Could you add a TopWindow method to set the window topmost, which calls SetWindowPos(hWnd, HWND_TOPMOST, ...) ?
