Well, there is no WndShow in U++, but Hide calls it for TopWindow... And you are right, hiding is good as well.

OTOH, U++ is designed that it mostly does not matter. Only "internal state" that really exists is focus - and that one is stored as "active focus" in TopWindow anyway.

Other answer:

Well, I can adding TopMost modifier, but for now please use:

```
TopWindow& ExStyle(dword _exstyle);  
dword    GetExStyle() const;
```

(like ExStyle(GetExStyle()) | WS\_EX\_TOPMOST)

(note that it works the U++ way - does not matter whether TopWindow is open or not).

Mirek
