forlano wrote on Sun, 18 February 2007 10:51Hello,
several versions ago with the following Display:
class ColoredCell: public Display
public:
 static bool isBlack(String s);
 void PaintBackground(Draw& w, const Rect& r, const Value& q,
              Color ink, Color paper, dword style) const;
};
bool ColoredCell::isBlack(String s)
 if(s[1] == 'B') return true;
 return false;
}
void ColoredCell::PaintBackground(Draw& w, const Rect& r, const Value& q,
                    Color ink, Color paper, dword style) const
{
  if( isBlack(AsString(q)) ) paper = Color(255, 150, 150);
Display::PaintBackground(w, r, q, ink, paper, style);
I was able to set pink the background of a cell. Only now I saw that the color is not uniform. It
does not appear under all the content of cell:
It seems a problem of transparency.
Am I wrong?
Luigi
This is a picture of the look with the previous release that show what I mean:
