Subject: How to access a firebird database ?
Posted by jibe on Thu, 01 Mar 2007 17:33:29 GMT

Hi,

I'm discovering UPP and seriously thinking to adopt it. However, the database I mostly use is firebird... So, I have some questions about that :

Will Firebird implementation be soon developped ?

Could I help for this developpement ? (or, if it's not too long and difficult, I could do the main part of the job, but I'll need a lot of advices as I don't know yet UPP !)

Is there another way (external library ? which one ?) to work with firebird database ?

thanks.
