I've removed projects that are under development and fixed others.

There is one problem left in project Ole_Ctrl:

util.cpp(466) : error C2664: 'LoadTypeLib' : cannot convert parameter 1 from 'Upp::WString' to 'const OLECHAR *'
    No user-defined-conversion operator available that can perform this conversion, or the operator cannot be called

I've also put "using namespace UPP;" into OleCtrl.h in order to be able to compile it.

A result is attached.

I can prepare project files for the whole UPP if somebody needs them. I can also build project files for vc8, bds4, cc, em3 and ghs
