Now I wish to add c++ compiler, U++ and install on a pendrive (this can be an'idea for a new distro... Uppuppy).

Luigi

Oh I can just see all the puns popping up ahead.

...the distro war cry will be "Upp Yours".

...version updates will be called uppscaling.

...when a user loses their temper they are being upset.

...when someone gets full of themselves, they are being Uppity.

Oh, I think I better stop now

Have a joyous day y'all
