Subject: [BUG] Icon designer

I have some question on the icon designer:

If I create a new image and start to design an icon and then press the "Empty" button then my image is cleared by it keeps its size.

If I press the "Empty" button after having selected an area using
"Select (Space)" of the image then the whole image disappears. If I close the icon designer and come back then the image dimension are set to (0, 0) and theIde crashes when I try to remove the image from the iml file.

I am using the following config:
- 2007.1 rc3,
- Win XP SP2,
- CtrlLib application w/ main window & iml file.

Victor
